# Use of energy storage batteries in Bergen Norway

Does Norway have a battery market?

Today Norway has not one, but two huge battery markets. "There are two market drivers for batteries: EVs and stationary energy storage. Energy storage is coming on strong now. It's the key to turning intermittent wind and solar into a stable energy source," explains Pål Runde, Head of Battery Norway.

What is Battery Norway?

Battery Norway (Norwegian Battery Platform) is a national industrial collaboration platform focused on innovation and sustainable value creation opportunities, encompassing the entire battery supply chain. It will closely follow the EU's battery strategy and act as an advisor to the authorities. Battery Norway aims to help to:

How big is Norway's battery market?

batteries for stationary energy storage - a market expected to reach EUR 57 billion by 2030. Now, a more mature Norwegian battery industry has greater potential to accelerate the renewable energy transition in Europe. Today Norway has not one, but two huge battery markets.

Where are EV batteries stored in Norway?

Instead, EV batteries in Norway are taken apart and sent for further sorting and recycling in Europe, North America and Asia. In Europe, the batteries often end up at a recycling plant.

Corvus Energy specializes in purpose-engineered energy storage solutions, particularly for the maritime industry, where they have established themselves as leaders in battery storage ...

Norway is at the forefront of energy storage innovation, leveraging its rich hydropower heritage and cutting-edge technologies. Renowned for its extensive hydropower ...
