How much does a wall-mounted solar system cost in the UK?

The installation cost of wall-mounted solar power systems for standard residences in the UK is influenced by core factors such as system scale, panel type, brand positioning, and installation complexity. According to industry statistics in June 2025, the basic installation cost for a 4kW wall-mounted solar system starts at £5,000.

What are wall-mounted solar panels?

As its name indicates, wall-mounted solar panels are also a type of solar panel utilizing the PV system. What tells them apart from others is the placement location. Rather than horizontally on the roof, they are secured directly to the wall with specialized components. This helps to reduce wind loads on the roof.

Are wall-mounted solar panels a good alternative to roof-mounted panels?

Wall-mounted solar panels offer an alternative to roof-mounted panels and have benefits such as reducing carbon footprints and lowering electricity bills. Proper installation is crucial for wall-mounted panels, requiring strategic placement and special mounting hardware to maximise energy absorption.

Can solar panels be mounted on a wall?

Roof-mounted solar panels are usually titled at a 20-50 degree angle, which allows them to capture sunlight when the sun is high in the sky. But most wall-mounted panels are parallel to the wall, or only slightly tilted. It's also harder to fit as many solar panels on a wall as you would on a roof.

Are wall-mounted solar panels as effective as roof-mounted solar panels? Wall-mounted solar panels are usually less effective than roof-mounted systems because they often ...
