# Waterproof Financing for Energy Storage Containers Used in Oil Refineries

Which oil & gas companies are based on proven oil and gas reserves?

Based on proved oil and gas reserves, 17 of the top 20 oil and gas companies in the world are NOCs with IOCs controlling less than 10% of the world's proven oil and gas resources base. NOCs are looking at increasingly flexible means of structuring the monetisation of their upstream resources while also instigating downstream activities.

Should oil and gas projects be refinanced at a later juncture?

As noted in a number of sections above, it is not uncommon for the financing of an oil and gas project to contemplate or even incentivise refinancings at a later juncture through step-up adjustments to margin over time (a margin "ratchet") and often using alternative financing structures.

Do IJVs lend themselves to a limited or non-recourse project financing?

IJVs lend themselves well to a limited or non-recourse project financing where the project no longer features on the balance sheet of the sponsors, save to the extent of any parent company guarantees or debt service undertakings required to be provided by way of completion support for the project.

What type of Finance is used in a midstream or downstream context?

This category of finance is often relevant in a midstream or downstream context where, for example, an investor is seeking to purchase an existing gas distribution or transmission asset. Leveraged financings sourced through a combination of commercial banks and institutional investors may be used for this purpose.
