
Western European solar container battery Company

Foreign Trade

Can Europe build a world-leading battery industry?

T&E calls on clear foreign investment rules and a comprehensive European strategy for battery supply chains. Europe's ambition to build a world-leading battery industry is facing many headwinds. As local plans falter, over 90% electric car and storage batteries are produced by South Korean and Chinese companies in the EU.

Why is analyzing the EU trade in green energy products important?

In the context of the European Green Deal, analyzing the EU trade in green energy products is crucial for understanding geopolitical dependencies, assessing energy security, and supporting domestic industries.

Are European carmakers partnering with Chinese battery companies?

Many European carmakers are entering partnerships with Chinese battery players to secure the supply. But there are concerns about the environmental and social conditions under which some of these facilities, e.g. CATL battery plant in Hungary, are operating.

Are foreign battery investment rules EU-wide or national?

Analysis of Foreign Battery Investments in EU External experts commissioned by T&E find no EU-wide or national requirements on technology transfer and breaches of air pollution rules from battery factories in Poland and Hungary. T&E calls on clear foreign investment rules and a comprehensive European strategy for battery supply chains.
