## What is solar flat tile

What are solar tiles?

Solar tiles are roofing materials that can produce energy directly from sunlight. Solar tiles are integrated into the roof itself and function as both a roofing substance and a source of energy, as opposed to conventional solar panels, which are mounted on top of an existing roof.

What is solar roof tile?

Solar Roof Tile designed by ANU is for single groove designed Mangalore Tiles and can be used for all types of Solar Power Applications. We have also kept the rates at par with conventional panel along with mounting structure so that there is not much of an incremental cost to switch over to Solar Roof Tile.

How do solar tiles work?

Solar tiles are integrated into the roof itself and function as both a roofing substance and a source of energy, as opposed to conventional solar panels, which are mounted on top of an existing roof. Photovoltaic cells in solar tiles turn sunlight into direct current (DC) energy.

What is a solarflash<sup>®</sup>; flat tile kit?

The SolarFlash<sup>®</sup>; flat tile kit is designed for flat concrete tiles (eg Marley Modern, Redland Mini Stonewold) and plain tiles (eg Redland Rosemary, Marley Acme). The dimensions of the 'small' SolarFlash<sup>®</sup>; are 250mm width/235mm length. The hood is 50mm width/140mm length/40mm depth. The hood is the same size on all types of SolarFlash<sup>®</sup>;

A step-by-step guide to installing solar panels on concrete roofs, including tools, preparation, mounting, and maintenance for a sustainable energy source.
