# What to do if the outside of the solar energy storage cabinet is broken

What should I do if my solar panel is damaged?

When dealing with broken or damaged solar panels, it is crucial to assess the extent of the damage before proceeding with any repairs or replacements. This process comprehensively evaluates the panel's physical condition and electrical performance. Begin by conducting a meticulous visual inspection of the solar panel.

What should I do with salvaged solar panels?

Ensure that the salvaged panel is compatible with the off-grid system, and consult with a solar professional to design an appropriate system layout that maximizes the use of the salvaged panel's output. Consider donating or reselling still functional panels to others in need.

What happens if a solar panel is broken?

Common causes of solar panel damage are falling objects, thermal stress, and micro-cracks and scratches. A broken solar panel may continue to work, albeit at a reduced efficiency. Broken solar panels pose a serious fire and safety risk and must be removed and replaced. Some companies can fix broken solar panels, but this is costly.

Can a broken solar panel be recycled?

A broken solar panel that cannot be repaired will have to be taken away for recycling. Whatever you do, do not throw it in a landfill or dump it anywhere. Solar panels contain harmful or toxic elements that can cause environmental damage if they leach into the ground.
