
Wholesale 37.5kva transformer in Italy

What is a 37.5 kVA transformer made of?

Most single-phase 37.5 KVA transformers are made of solid resin mass, sealed in silica sand. This coverage is to enclose and protect the coil. The winding materials used in this transformer are copper with a 600V and 120/240V primary and secondary voltage, respectively.

Who manufactures electric transformers?

The company, MARTIGNONI ELETTROTECNICA SRL, specializes in Electrical & Electronic Manufacturing and offers a range of products, including Electric Transformers. Their transformers are designed to efficiently lower or raise alternating voltage, tailored to meet clients' specific requirements.

What is a 37.5kva transformer?

The 37.5kva transformer usually has a single-phase unit with two voltages, a 240x480V primary and 120/240V secondary. It is robustly constructed using high-grade materials like budding and cold-rolled silicon steel laminations. This equipment is also powered with innovative technology to ensure it'll serve its purpose safely and efficiently.

Who is Trafo Elettro?

Trafo Elettro is a manufacturer that offers a diverse array of transformer products, such as cast resin, oil immersed, and power transformers, among others. The company's commitment to product quality and customer service underscores its expertise in the transformer industry.
